Dear Agrisen

On the 11-02-2020 there has been a sampling in the CPH airport.

It is sent from you on the 10-02-2020 lot. No. 1-601-680 Item 11-005 Sweet basil.

The test report shows a number of pesticides that is illegal and has exceeded the limits. But this time it's also categorised as a dangerous food item. How can it be possible, that the result shows pesticides there is illegal in E.U.? And for the second time?

This was the reason why I immediately cancelled this product today. Please send me a satisfied test result before we begin to import again, and please have more control over the farms.

You can see the test result in the attached file.

Please note I need a serious response from you regarding this matter! How do you prevent these kind of issues in the future?

Regards

Diana Christiansen
